

MUTOH

Mutoh VJ-626UF

The Mutoh ValueJet 626UF is the perfect printer to compliment your current setup. With its ability to print direct to substrate plus the option to add 3D elements with the spot varnish it offers you options you haven't had before. Whether you are planning small textured braille signs or custom printing onto bottles, the VJ626UF is a very powerful machine that can do it for you. The LED UV inks are strong and flexible for printing on a range of different substrates - including glass, wood, plastic, vinyl, and more.

*Optional Rotary attachment required for printing on to larger round items.

Rotary unit available for bottles and other round objects

Time-saving features like measuring the height of objects and automatically adjusting the table for dot-

CCMMYK or CMYK + White + Varnish 220 ml

Purchase 2-3 inks and receive 5% off. Purchase 4 or more and receive 10% off

Product Code: VJ626UF
