KEENCUT Sabre Series 2

The versatile cutter designed
for safety and accuracy

The Sabre Series 2 is a genuine all round cutter bar that will slice through 13mm thick foamboard or trim tissue paper gently. It is perfect for the print shop, workshop, studio, architects' practice, or educational institution.

It's simple to use, incredibly versatile and purposely designed for your safety.

Quick payback through reduced
waste and cutting time

Genuine all round cutter bar
purposely designed for your
safety

5 Year Guarantee

KEENCUT Sabre Series 2

Perfect for cutting:

Semi-rigid materials

- PVC foamboard < 13mm
- Corrugated / fluted plastic e.g Correx < 13mm
- Corrugated cardboard < 13mm
- Foam centred board < 13mm

Rigid materials (scoring only)

- Cast acrylic / Plexiglas < 3mm

Flexible materials

- Banners
- Card & Paper
- Magnetic sheet up to mm
- Self-adhesive vinyl
- Textiles and delicate materials

Versatile

The Sabre Series 2 will safely cut a wide range of materials, up to 13mm thick and 3m wide. It is a fully mobile cutting solution with no need for calibration when installed. Its strong base will compensate for a substandard work surface to provide a stable cutting platform and it will sit directly on a bench or can be mounted on an optional stand that has the capacity to be fitted with a waste catcher and roll feed to become the perfect production cutter.

Secure and accurate

The Sabre Series 2 has guaranteed 1.0mm accuracy. Full-length silicone grip strips in the base and underside of the cutter bar hold your cutting media firmly in place. The integral base plate has metric parallel indents and a cut groove to assure accuracy. Floating, self-adjusting hinges automatically adjust to give lay-flat cutting on materials up to 13mm thick and holds the slideway above the work-surface for easy repositioning of the media.

Safety by design

The Sabre Series 2 is designed to provide maximum operator safety for all users in a wide range of environments such as commercial offices, industrial workshops or craft studios. The automatic blade retraction and safely contained blades also protect the user when placing material on the cutter.

Simple to use

The Sabre Series 2 is simple to operate, requiring little training. The ergonomically designed cutting head allows single-handed cutting action and uses downward pressure to engage the blade. The single tool head offers a choice of three blade holders which can be switched safely and quickly to suit different materials. Blade changing and depth adjustment are simple and completed without the use of additional tools.
